

Re: Junior Front-end Developer position

16 Jun 20

To whom this may concern,

I would like to apply for the position of Junior Front-end Developer as advertised 16 June by Inspiring Interns recruitment agency on Indeed.com. I was especially interested in this position as it would offer me a great start to my career within the web development industry.

I am currently completing the front end web development traineeship at CDET B Finglas, Dublin. During my time in training, I have gained the following technical skills in all areas of the front end web development process

- CSS3
- HTML5
- JavaScript
- Github
- React JS library
- Wordpress Content management systems

Other skills include experience in project management, knowledge of mockups and wireframes, achieving deadlines, problem-solving ability and communication skills working independently and within a team.

You can view my portfolio of recent work at my personal portfolio website [www.oliviahyland.com](http://www.oliviahyland.com)

I would love the opportunity to talk to further about the position and I appreciate the time you have taken to review my application.

Yours Sincerely,

Olivia Hyland
